| F3:Search | F10:Switch the interface |
| F4:Previous Track | F11:Open Settings |
| F5:Play/Pause | F12:Power display |
| F6:Next Track | |

Instruction

- Code Matching Mode:**
 - Turn on the power switch on the keyboard.
 - Press a BT key for 3 seconds. The BT indicator will flash in white light.
 - Turn on the BT of your device and search. (BT name:Bluetooth 5.1 KB2) , click the BT name, and then your device will connect to the Keyboard.
 - When the connection is done, the BT indicator will go out.

- Device Switch:**
After the keyboard is connected with your device, you can simply click the relevant BT icon key to select the connected device, and the relevant indicator light will stay on. If you don't need to connect the keyboard with three devices, you can also connect the keyboard with one or two devices.

- Battery Detection**
Please charge in time when the battery voltage is in low voltage. (Press F12 to view the device power display, and the indicator will flash 1 to 4 times.)
If the indicator flashes four times, the current battery is 100%;
if the indicator flashes three times, the current battery is 75%;
if the indicator flashes twice, the current battery is 50%;
if the indicator flashes once, the current battery is 25%.

- The keyboard will go in to sleep mode without any action in a period of time. But it can be woken up by pressing any key.

- Troubleshooting**
 - Make sure the keyboard is on (slide switch in "ON" position).
 - Make sure the keyboard is in operating distance (within 10 meters).
 - Ensure the battery storage has power.
 - Make sure the BT in tablet / PC / smartphone is on.
 - Ensure wireless keyboard have already matched with BT.
 - If you cannot find "Bluetooth 5.1 KB2" in the "add new devices", it might be because the "Bluetooth 5.1 KB2" is in the "BT interface and other devices" list, you can delete it and add it again.
